8. Explanation of the Change:

The Department of Geography and Geospatial Sciences has reviewed the curriculum for the Sustainability Minor. Overall, this modification incorporates new courses in the program (e.g., some newly created) and deletes courses that are either no longer offered, offered less frequently, or have changed their emphases away from sustainability. The requested changes include:

The Department of English has recommended to remove of ENGL 256 Literature of the American West from the Human Dimensions elective list because it is uncertain how often the course will be taught.

The Ness School of Management & Economics stated that ECON 372 Introduction to Resource and Environmental Economics is no longer offered and recommended to replace the course with AGECECON 472 Resource and Environmental Economics. They also requested to remove MKTG 370 Marketing. The course no 0 1 16 Tf1 000912 0 612 reW*nBT/F1 9.96 Tf1 0 0 1 384.67
